TURBOCHEF

NGC OVEN PART STOCK AND PRICE LISTING

USER INSTRUCTIONS

- ✓ This one document will act as the price list as well as your part stocking calculator. At the far right of the sheet you will notice four columns with oven quantities listed. Choose the column that best fits your market; these are your recommended stock quantities.
- ✓ This document has both International parts as well as U.S. parts. The far left column in yellow will indicate if the parts are for International use only. If the stock item in question is "voltage specific", the second column will be colored blue. Be sure to use these two columns together when identifying the proper part for stocking purposes. (If the part number in question is listed in blue or yellow, verify your application).
- ✓ This document has a filtering column for quicker and more precise searches. The column labeled "Filtering Category" has an arrow in the bottom right corner. Every part on the list is labeled with a category name. Click on the arrow and the list of categories will appear. Click on the appropriate category and all of those parts will appear on the sheet. Go back to the arrow and click on "All" to return to the main sheet.
- ✓ At the bottom of the sheet you will see three other tabs to help your part search: "Past Number Changes", "Control Board Listing" and "Consumables".
- ✓ The "Past Number Changes" sheet will help identify part numbers that have evolved over the years and list the latest number. The old numbers have been removed from the main sheet to help streamline the search process. If your part number is not on the main list, check this tab for a change, then use the new part number on the main list.
- ✓ The "Control Board Listing" sheet will have every I/O Control Board with the proper menus listed with detail to customer and electrical requirements. The list also will show the software code that is printed on the actual e-prom in the oven to help recognize the software in the field.
- ✓ The "Consumables" sheet lists items like cooking surfaces, cleaner and oven carts.
- ✓ Any changes made to the listing from the previous edition are highlighted in green.
- ✓ ALL PRICES ARE STATED AS "LIST PRICE".
